Presenter cheat sheet: HEINEKEN Global News Curator

Every scenario: Agentic → Chat → **new chat** → agent **HEINEKEN Global News Curator** → type `What's new in our local markets that we should share globally?` Answer by the **meaning** of the option (letters and scores can change). When unsure, take **(Recommended)**.

Scenario 1: From local market to global newsroom

Question	Answer
Which story should go global?	**HEINEKEN Vietnam makes progress on Brewing a Better Vietnam**
Image	**Reuse the local story's image** (Recommended)
Any flagged claim	**Leave it out** (Recommended)
Draft review	**Write it**

Point out: score per criterion and reason · placeholder pages left out · facts traced to local paragraphs · local → global summary · credit line "First published by HEINEKEN Vietnam on 16 June 2026." · SEO title ends `| The HEINEKEN Company`.

Scenario 2: Duplicate guard and brand check

Question	Answer
Shortlist	Show **Brewing a Better Vietnam** flagged **already global** and ranked down
Which story should go global?	**Tiger Êm** (low score: "the marketer decides")
Image	**Reuse the local story's image** (Recommended)
"...the leading international premium beer brand..."	**Leave it out**
Other promotional claims ("perfect choice", "world-acclaimed heritage")	**Leave it out**
Anything about drinking and social occasions	**(Recommended)**
Draft review	**Write it**

Point out: no duplicate · claims removed, nothing added in their place · headline in sentence case · credit line with 21 May 2026.
Alternative ending: pick **Brewing a Better Vietnam** again → choose **Stop** at "update / new copy / stop".

After each run

Click **Open in Page builder** → show headline, body, credit line and SEO fields → "An editor reviews and publishes; the agent never publishes and never changes the local site."

Never publish demo pages. Reset: delete the new global stories under `heineken` `/newsroom/2026` (they end with "First published by HEINEKEN Vietnam on ..."). Never touch `heineken-vietnam`.

If...	Then...
Story already flagged in scenario 1	A previous run left its page: reset, new chat
"No local story matches ..."	Use the plain request
Agent recommends no image	Continue without an image
Marketer MCP or skill missing	Agent → Tools & skills → turn it on / attach it → new chat
Anything odd	New chat, run again: nothing is written before your approval
